Foreword

序言

This report presents the final results of the 1991 Population Census in detailed form, providing cross tabulations covering population, households and living quarters in the whole territory. It contains 108 main tables relating to the whole range of census topics.

The 1991 Population Census comprised a 100% enumeration of all persons by age and sex and a one-in-seven sample enquiry on a broad range of demographic and socio-economic characteristics of the population. All households in Hong Kong were enumerated during a ten-day period from 15 to 24 March 1991. The Census results provide a snapshot of the size and characteristics of the population on the Census reference date of 15 March 1991.

Results of the 1991 Population Census are also available in other publications already released. A list of their titles is given at the end of this report. Further analysis and interpretation of the Census results will be available in the "Main Report" which will be released at the end of this year.

本報告詳細發表一九九一年人口普查的結果，載列有關全港人口、住戶及屋宇單位的相關統計表。報告中的一百零八個統計表涉及一整系列的人口普查主題。

一九九一年人口普查，從全民蒐集有關人口的年齡及性別資料；此外也包括一個抽樣統計調查，用抽樣方法選出一個七分之一的住戶樣本，以蒐集有關人口的社會及經濟特徵等詳細資料。在一九九一年三月十五日至二十四日的十天期間，訪問了本港所有住戶，以進行點算。普查的結果顯示在一九九一年三月十五日普查日時本港人口的數目和他們的特徵。

本處較早時已出版一些載有一九九一年人口普查結果的報告，該等刊物的名稱詳列於本報告末頁。至於普查結果的深入分析和詮釋則會在本年底出版的「主要報告」中發表。

Explanatory Notes

Introduction

The 1991 Population Census comprised a 100% enumeration of all persons by age and sex and a one-in-seven sample enquiry on a broad range of demographic and socio-economic characteristics of the population. Data on the count of population, households and living quarters are obtained from the complete enumeration, whilst data on their detailed characteristics are provided by estimates derived from the sample enquiry. In preparing the tabulations, an adjustment has been made as necessary to allow for persons in non-contact households.

Coverage of the report

The population figures covered in this report, other than the resident population given in Table A1, refer to the enumerated resident population of Hong Kong. The following categories of persons counted in the Census are not included:

- (a) 151 833 residents who were temporarily away from Hong Kong on the Census reference date of 15 March 1991;
- (b) 35 823 transients; and
- (c) 51 847 Vietnamese migrants including Vietnamese refugees, Vietnamese migrants having been screened out and those pending determination of refugee status, ex-China Vietnamese illegal immigrants, Vietnamese migrants rescued by ocean-going vessels and children born in Hong Kong to the above categories of Vietnamese migrants.

The exception mentioned above, viz. the resident population given in Table A1, refers to the entire resident population (i.e. all persons usually residing in Hong Kong including those temporarily away from Hong Kong on the Census reference date).

Living quarters covered in this report are those occupied on the Census reference date. The figures on households refer to domestic households, which accounted for 98.6% of the enumerated resident population. The rest of the population were in collective households. The 11 102 enumerated marine residents were living on board 2 179 vessels on the Census reference date. Hence statistics on type of living quarters, rent and tenure are not available for them.

The data in Tables A1, A2, A4, D1, D9, D16, E1, E2, E3, E10, E12, E13, F1, F2, F3, F8 and F9 are obtained from the complete enumeration. As for the other tables, the data are estimates derived from the sample enquiry. To achieve consistency between total counts obtained from the complete enumeration and estimates derived from the sample enquiry, the "ratio estimation" method is employed. Total counts of living quarters by type, households by type of living quarters and population by age and sex at the District Board district level were chosen as controls when applying the method. The control process ensures that corresponding estimates derived from the sample are consistent with these total counts in each District Board district. Such an approach is generally adopted by statistical authorities worldwide when conducting a census with complete enumeration supplemented by a sample enquiry.

Because the control was applied at different hierarchical levels, estimates derived from the sample enquiry involving characteristics cross-relating population, households and living quarters and estimates derived from the sample enquiry in smaller geographical units, e.g. new towns, are not necessarily identical with the respective total counts. Examples for illustration are given as footnotes to the tables concerned in the report. Usually the differences are very small.

Bilingual presentation

This report is presented basically in bilingual form except for the tables. There is at the end of the report a "Glossary" of the terms and footnotes presented in the tables given in both English and Chinese. This will facilitate readers who want to refer to the tables in Chinese.

Definition of terms (in alphabetical order)

- (1) **Activity Status:** The population can be divided into two main groups, economically active population (i.e. the labour force) and economically inactive population as follows:

Economically active population: This comprises the employed (i.e. the working population) and the unemployed.

The working population refers to persons aged 15 and above who performed some work for wage/salary or were on leave/holiday during the seven days before enumeration in the 1991 Population Census. The working population can be distinguished into:

Self-employed: A person who works on his own account, neither employed by someone else nor employing others.

Employer: A person who works on his own account and employs one or more persons to work for him.

Employee: A person who works for wage/salary in local/overseas government, private company or government subsidized organization. Domestic helpers working for wage are included in this category.

Unpaid family worker: A person who lives with his family and does work (not domestic work) as part of the family enterprise in return for food and lodging.

The unemployed persons refer to persons aged 15 and above and not of independent means who were not at work during the seven days before enumeration in the Census but were seeking work and available for work. This excludes those who were on leave/holiday during the reference period.

Economically inactive population: This comprises persons who did not have a job and were not at work during the seven days before enumeration in the Census, excluding persons who were on leave/holiday during the seven-day period and persons who were unemployed. The economically inactive population can be distinguished into:

Home-maker: A person who looks after the home without pay.

Student: A person who is studying full-time in school or other educational institution. Persons who are self-studying, or studying informal courses in miscellaneous training institutes or studying evening courses and were not working during the seven days before the enumeration of the Census are also included in this category. Student workers are classified as economically active persons and are not included in this group.

Retired person: A person who has worked previously but is not currently working because of old age.

Inmate of institution: A person who is under care or custody in either a penal, medical, mental or charitable institution.

Others: Economically inactive persons not elsewhere classified, e.g. unpaid religious workers and persons who do not have to work for a living or who cannot work or do not seek work because of sickness or disablement.

- (2) **Age:** The number of complete years a person has passed since birth.
- (3) **Area of Destination (of Internal Movement):** The area in which a person was enumerated in the Census.
- (4) **Area of Origin (of Internal Movement):** The area in which a person lived five years ago.
- (5) **Average Number of Domestic Households per Living Quarters:** This is calculated by dividing the total number of domestic households by the total number of living quarters occupied by at least one domestic household.
- (6) **Average Number of Occupants per Living Quarters:** This is calculated by dividing the total number of persons found in living quarters on the Census reference date by the total number of occupied living quarters.

- (7) **District Board District:** These geographical districts are declared by the Governor-in-Council under the District Board Ordinance, Chapter 366 on 24 July 1990 for District Board elections. There is a total of 19 districts: 4 on Hong Kong Island; 6 in Kowloon and New Kowloon and 9 in the New Territories.
- (8) **Domestic Household:** A domestic household consists of a group of persons who live together and make common provision for essentials for living. These persons need not be related. If a person makes provision for essentials for living without sharing with other persons, he is also regarded as a household. In this case the household is a one-person household.
- (9) **Domestic Household Composed of One Nuclear Family:** A household composed of either one unextended nuclear family, one vertically extended nuclear family or one horizontally extended nuclear family. Please also see the definition of **Household Composition** in (20).
- (10) **Domestic Household Having Moved Within Hong Kong:** A household whose head now living in a district/new town (at the time of the Census) that was different from the one in which he lived five years ago. A move is defined as a change of residence during the past five years (a) from a District Board district to another District Board district; or (b) within a District Board district in the New Territories, i.e. from a new town to other areas in the district or vice versa.
- (11) **Duration of Residence in Hong Kong:** The total number of complete years for which a person has lived in Hong Kong. Any period of temporary absence from Hong Kong for six months or more was not counted in reckoning the duration.
- (12) **Duration of Residence in Present District:** The number of complete years for which a person has lived in the district.
- (13) **Economically Active Population:** Please see **Activity Status** in (1).
- (14) **Economically Inactive Population:** Please see **Activity Status** in (1).

註釋

引言

一九九一年人口普查包括一項就全港人士進行的全面點算以及一個抽樣統計調查。全面點算蒐集有關人口的年齡和性別資料，而抽樣統計調查是從本港所有的住戶中選出一個七分之一的樣本，以蒐集有關人口的社會及經濟特徵等詳細資料。本報告內有關人口、住戶及屋宇單位的總數，是由全面點算所得，而有關它們的特徵的詳細資料，則經由抽樣統計調查估算所得。本處在匯總時，已就無法接觸的住戶及其居民作出估算。

報告範圍

本報告所刊載的數字，除表 A 1 所列的居民總數外，都是指實際點算居民，下列各類人士並不包括在本報告內：

- (一) 在普查日（即一九九一年三月十五日）暫時離港的 151 833 名居民；
- (二) 35 823 名過境旅客；及
- (三) 51 847 名越南船民，包括越南難民、已甄別為非難民及等待甄別的越南船民、從中國來港的越南非法入境者、由遠洋輪船援救的越南船民，及以上各類越南難民／船民在本港出生的兒童。

上述表 A 1 內的居民總數是指全港居民（即所有通常居港人士，包括在普查日暫時離港的居民）。

本報告包括在普查日所有有人居住的屋宇單位。住戶數目指家庭住戶，佔實際點算居民人數百分之九十八點六。其餘的人口居住在團體住戶內。另外 11 102 名實際點算水上居民在普查日住在 2 179 艘船隻上，他們並不包括在有關屋宇單位類型、租金及租住權的統計數字內。

本報告的表 A 1、A 2、A 4、D 1、D 9、D 16、E 1、E 2、E 3、E 10、E 12、E 13、F 1、F 2、F 3、F 8 及 F 9 所列數字，是由全面點算所得，其他列表上的數字，則經由抽樣統計調查估算所得。在進行估算時採用了「比率估計」方法，使由全面點算所得的數字與經由抽樣統計調查估算所得的一致。採用這方法時，每一區議會分區內按屋宇單位類型劃分的屋宇總計，按屋宇單位類型劃分的住戶總計及按年齡、性別劃分的人口總計均用作參考總數，確保與經由抽樣統計調查估算所得的各區議會分區內有關總計融合。各國以全面點算而附以抽樣統計調查進行人口普查的統計機構，一般都採用類似的估算方法。

由於不同特徵的總計分別用作參考總數，因此，同時涉及人口，住戶及屋宇單位特徵的抽樣估算數字及在一些較區議會分區細小的地區，例如新市鎮的抽樣估算數字與全面點算所得的個別總計並不一定相同。這類情況已在有關統計表的註腳中附以舉例說明。不過一般來說，差別都是很少的。

Notes on Classification of Occupations
 (For Chinese translation, please refer to p. 323 in the "Glossary" section)

職業分類法註釋
 (中文翻譯載於「詞彙表」部份，見 323頁)

Since 1971, the classification of occupations for the population censuses and by-censuses in Hong Kong has been modelled on the 1968 International Standard Classification of Occupations (ISCO-68). Due to the emergence of many new types of jobs and increasing complexity of jobs in certain occupations, a new classification was promulgated by the International Labour Organization in 1988, known as the 1988 International Standard Classification of Occupations (ISCO-88). The classification used in the 1991 Population Census is modelled on this.

Both in ISCO-68 and ISCO-88, "type of work performed" is the basic criterion for classifying occupations. However, there is much greater emphasis placed on the differentiation of skill level and skill specialization of jobs in ISCO-88 than it was in ISCO-68 in assessing "type of work performed".

To illustrate the difference between the two classifications of occupations, a few facts are provided below:

- (a) Under ISCO-68, managers in the wholesale, retail, import and export trades were included in the group "Sales workers" and managers in the catering and lodging services in the group "Service workers"; they are included in the group "Managers and administrators" under ISCO-88.
- (b) "Associate professionals" under ISCO-88 comprises essentially "Technical and related workers" under ISCO-68. However, this group also includes some occupations from the groupings "Clerical and related workers", "Sales workers", "Service workers" and "Production and related workers, transport equipment operators and labourers" under ISCO-68. Take for example, insurance representatives under "Sales workers" and production controllers under "Production and related workers" are "Associate professionals" under ISCO-88.

- (c) "Production and related workers, transport equipment operators and labourers" under ISCO-68 are further distinguished into "Craft and related workers" and "Plant and machine operators and assemblers" under ISCO-88.
- (d) Occupations which require very little skill are grouped together as "Elementary occupations" under ISCO-88 instead of being scattered in such occupational groups as "Clerical and related workers", "Sales workers", "Service workers", "Agricultural workers and fishermen" and "Production and related workers, transport equipment operators and labourers" under ISCO-68.

Since ISCO-88 involves greater disaggregation of occupations by skill level and skill specialization, it is not possible to convert the 1986 occupational data (classified on the basis of ISCO-68) to conform with it. On the contrary, it is possible to convert the 1991 data to conform with ISCO-68 to enable a comparison to be made of the data from the 1991 Population Census with those from the 1986 Population By-census. The table below is such a comparison.

Notes on Classification of Occupations

職業分類法註釋

由一九七一年起，香港人口普查及中期戶口統計採用的職業分類法皆以「一九六八年國際標準職業分類法」(ISCO-68) 為藍本而編定。由於新類型工作的出現及部份職業涉及的工作日趨繁複，國際勞工組織於一九八八年頒佈了一套新的職業分類法。該分類法為「一九八八年國際標準職業分類法」(ISCO-88)。一九九一年人口普查的職業分類法是以這個分類法為藍本編定的。

不論ISCO-68 或ISCO-88，在把職業分類時都是以職業的「工作類型」為準則。在評估職責的「工作類型」時，ISCO-88 較ISCO-68 更強調不同工作所需的技術水平及技能專門性。

以下數點可以說明這兩個職業分類法的分別：

- (a) 在ISCO-68 中批發、零售及出入口業經理歸入「銷售人員」類，而飲食及旅店業經理則歸入「服務行業人員」類。在ISCO-88 中，此等人士皆納入「經理及行政級人員」類。
- (b) ISCO-88 分類中的「輔助專業人員」不但包括ISCO-68 的「技術及有關工作人員」，同時亦包括ISCO-68 一些分類中的部份職業，這些分類包括「文職及有關工作人員」、「銷售人員」、「服務行業人員」及「生產及有關工作人員、交通工具操作員及工人」。例如，ISCO-68 的「銷售人員」分類中的保險代表及「生產及有關工作人員」分類中的生產控制員，在ISCO-88 內皆納入「輔助專業人員」類。
- (c) ISCO-68 的「生產及有關工作人員、交通工具操作員及工人」在ISCO-88 細分為「工藝及有關人員」及「機台及機器操作員及裝配員」。
- (d) 在ISCO-68 中，需要極少量技術的職業分佈於「文職及有關工作人員」、「銷售人員」、「服務行業人員」、「農業、畜牧業、林業人員及漁民」及「生產及有關工作人員、交通工具操作員及工人」等類別內，而在ISCO-88 中，此等職業全部均屬「非技術工人」類。

與ISCO-68 比較，ISCO-88 就職業的技術水平及技能專門性，對各種職業作較詳細的分類。故此，一九八六年的職業數據（以ISCO-68 為分類）不能將之轉化為以ISCO-88 分類的數據。反之，一九九一年人口普查的職業數據卻可以轉化為以ISCO-68 分類的數據，以使一九九一年人口普查及一九八六年中期戶口統計的職業數據可互作比較。下面的統計表展示了這個比較。

按職業（以ISCO-68 為分類）劃分的工作人口數目：1986 及 1991

<u>職業</u>	<u>1986</u>	<u>1991</u>
專業、技術及有關工作人員	220 528	237 264
